Calculate in Word

Make readable calculations directly in your Word document with Calculate in Word.

march 2023

Stop switching between your spreadsheet program and Microsoft Word

Do you need to make readable and trackable calculations?

Primary challenges

Structural Engineers make reports containing many calculations. These calculations must be readable and trackable.

Ideal solution

For complex engineering problems there are many software solutions, but these do not work for simple calculations. These simple calculations require a simple solution, which gives a quick output.

Desired outcomes

Calculate in Word allows you to make readable and trackable calculations directly in your Microsoft Word document. This Add-in works easily and intuitively.

Calculate in Word

Calculate in Word allows you to automatically calculate complex and simple mathematical formulas with ease, straight from your Word document. Make less mistakes and your calculation report will look great.

Make readable calculations

The calculations are readable and trackable. Format your calculations as desired, your document will look great.

Save time

Not only will you work more efficiently by making your calculations within MS Word, you will also make less mistakes

Stop switching

Stop switching between your spreadsheet program and Microsoft Word. Make your calculations directly in Word

Orange Dynamite Software, Calculate in Word, and Word

Start making your calculations in Microsoft Word and make readable documentations which look great while saving time.

Make readable calculations

The calculations made with Calculate in Word are readable and trackable.

Format your calculations corresponding your document

The formulas can be formatted as desired.

Save time

Stop switching between your spreadsheet program and text editor and work more efficient

Customer success: Jakob Udding, structural engineer

"We have been using Calculate in Word for making design documents on various structures," said Jakob Udding. "The Add-in enables us to work in one document without constantly switching between different programs, saving time and hassle."

Steel constructions

"We make calculations of a single span beams with Calculate in Word"

Present calculations

"Our calculations are readable and trackable, no black box calculations."

Save time

"We make our simple calculations directly in Word, this saves time and we can modify our reports quickly."
